

Products Supplied:

- HMI Canvas - printed glass inserts

Project Case Study

Project. As part of a new VIP tasting experience, J. Lohr Vineyards & Wines envisioned a private room that could showcase the rolling hills of Paso Robles while still offering the level of privacy needed for curated, invitation-only events.

Challenge. The design intent called for a custom glass feature that connected the tasting room to the surrounding vineyards while maintaining light, transparency, and privacy. The glass would be in a high-touch area, requiring a finish that was durable, easy to clean, and resistant to visible fingerprints and wear.

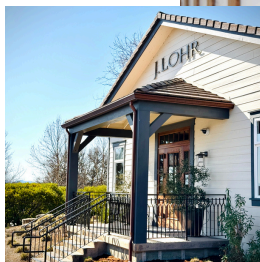

Impact. HMI Canvas™ Digital In-Glass Printing was used to apply vineyard imagery directly within the glass, transforming the door into a visual element without sacrificing transparency or performance. Because the imagery is baked into the glass, the surface remains smooth, durable, and easy to maintain —well suited for frequent use in a hospitality setting and a perfect complement to the custom oak doors by *Castlewood Door*.

Project Details

Name: J. Lohr Vineyards & Wines
Property Type: *Hospitality*
Product Supplied: *HMI Canvas - Ceramic Frit Printed Glass*
Completion Date: 2024

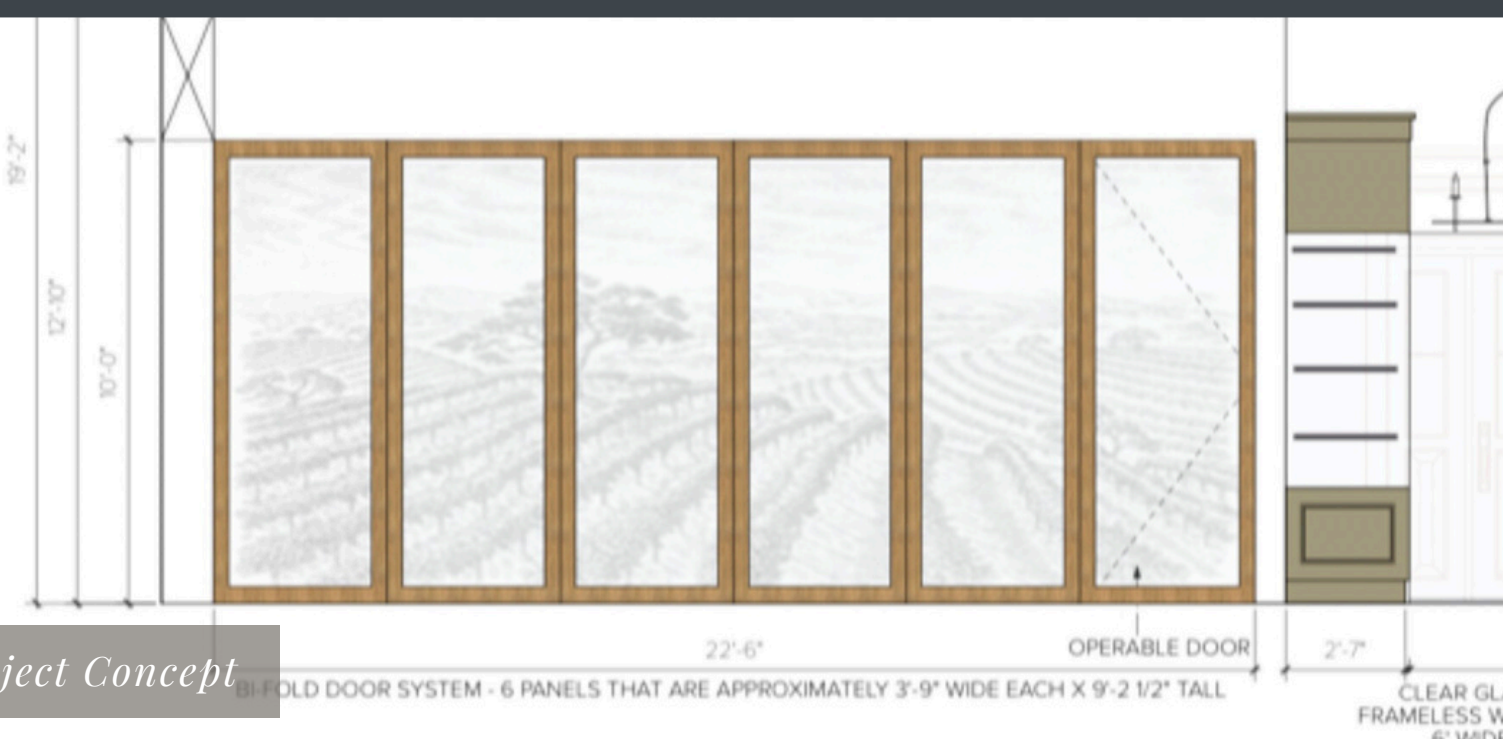

Project Team

Owner: *J. Lohr Vineyards & Wines*
Interior Design: *Design Collaborative*
Door Manufacturer: *Castlewood Door*
Contractor: *Vince Vanderlip, Inc.*

Key Benefits

Domestic Manufacturing
Unparalleled Service
Fast Leadtimes

Project Concept

High-Res Photography

Sandblast Effect Printed Glass
